

Rohan Mehta

Senior Full-Stack Software Engineer

Bengaluru, India | +91 98234 56789 | rohan.mehta@email.com |
github.com/rohanmehta | linkedin.com/in/rohan-mehta-dev

Professional Summary

Results-oriented Full-Stack Software Engineer with 6+ years of experience architecting high-throughput distributed systems, microservices, and user-centric web applications. Proven track record of optimizing system latency, scaling multi-tenant SaaS backends to support 5M+ daily active users, and reducing cloud infrastructure costs by 28%. Strong foundation in concurrency, domain-driven design, and CI/CD automation across modern cloud environments.

Technical Skills

- **Languages:** TypeScript, JavaScript, Python, Go, Java, SQL
- **Frontend:** React, Next.js, Redux Toolkit, Tailwind CSS, WebSockets, HTML5/CSS3
- **Backend:** Node.js, Express, NestJS, FastAPI, Spring Boot, GraphQL, RESTful APIs
- **Databases & Caching:** PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch
- **Cloud & DevOps:** AWS (ECS, Lambda, S3, CloudFront), Docker, Kubernetes, Terraform, GitHub Actions
- **Architecture & Standards:** Microservices, Event-Driven Architecture (Apache Kafka, RabbitMQ), System Design, TDD, CI/CD

Professional Experience

Senior Software Engineer

HyperScale Technologies | Bengaluru, India

August 2023 – Present

- Architected and deployed an event-driven payment processing pipeline using Go and Kafka, increasing transaction throughput by 45% and maintaining 99.99% uptime.
- Spearheaded the migration of a legacy monolithic platform into modular NestJS microservices on AWS ECS, reducing median API response times from 340ms to 85ms.

- Mentored a squad of 6 mid- and junior-level engineers, running code reviews, establishing strict ESLint/Prettier standards, and increasing automated test coverage from 58% to 88% via Jest and Cypress.
- Optimized Redis caching strategies and database query execution plans in PostgreSQL, cutting peak server resource utilization and reducing cloud expenses by 28%.

Full-Stack Software Engineer

CloudStack Solutions | Pune, India

October 2020 – July 2023

- Engineered responsive customer-facing web portals using React, Next.js, and TypeScript, improving Core Web Vitals and lowering first contentful paint (FCP) by 40%.
- Developed secure, multi-tenant REST APIs in Python (FastAPI) integrated with third-party webhooks, OAuth2 authentication, and Stripe billing.
- Implemented end-to-end CI/CD delivery pipelines using Docker and GitHub Actions, slashing deployment turnaround time from 4 hours to under 15 minutes.
- Collaborated with UX designers and product managers in 2-week Agile sprints to deliver 14 high-impact feature releases ahead of roadmap schedules.

Software Development Engineer (SDE-1)

InnoTech Labs | Pune, India

June 2018 – September 2020

- Built and maintained internal dashboard tools using Node.js, Express, and React, streamlining inventory audit workflows for internal operations teams.
- Designed relational database schemas in MySQL, writing complex joins, stored procedures, and migration scripts.
- Resolved 120+ high-priority bug tickets and contributed critical integration tests to ensure system stability during seasonal traffic spikes.

Key Projects

Distributed Task Queue & Job Scheduler (Go, Redis, Docker)

- Developed an open-source distributed background job processor capable of processing 10,000+ jobs/sec with exponential backoff retries and dead-letter queues.

Collaborative Code Workspace (React, WebSockets, WebRTC, Node.js)

- Built a real-time collaborative code editor with syntax highlighting, live peer cursor tracking, and low-latency operational transformation (OT) synchronization.

Education

Bachelor of Technology (B.Tech) – Computer Science & Engineering

College of Engineering, Pune (COEP)

Graduated: May 2018

Certifications

- **AWS Certified Solutions Architect – Associate** (Amazon Web Services)
- **Certified Kubernetes Application Developer (CKAD)** (Cloud Native Computing Foundation)
